

JD for Dotnet (.NET) Software Developer

Job Summary

Looking for a skilled **.NET Software Developer** responsible for designing, developing, testing, and maintaining scalable software applications using Microsoft .NET technologies. The role involves close collaboration with cross-functional teams to deliver high-quality, secure, and performance-driven solutions.

Key Responsibilities

- Design, develop, and maintain applications using **.NET / .NET Core / ASP.NET / C#**
- Develop **web APIs, MVC applications, and microservices**
- Work with **SQL Server / PostgreSQL / MySQL** for database design and optimization
- Implement **RESTful services** and integrate third-party APIs
- Ensure application performance, security, and scalability
- Debug, troubleshoot, and enhance existing applications
- Participate in code reviews and follow best coding practices
- Work with front-end technologies (HTML, CSS, JavaScript; Angular/React is a plus)
- Collaborate with DevOps for CI/CD and deployment

Required Skills

- **2–3 years** of experience in .NET development
- Strong proficiency in **C#, ASP.NET, .NETCore**
- Experience with **Entity Framework / LINQ**
- Solid understanding of **OOPconceptsanddesign patterns**
- Knowledge of **APIsecurity, authentication, and authorization**
- Experience with **Git/AzureDevOps/CI-CDtools**

Preferred Skills

- Experience with **Azure / AWS cloud services**
- Knowledge of **Docker, Kubernetes**
- Familiarity with **Agile / Scrum** methodology
- Exposure to **microservices architecture**
